

A smarter approach to master data management

EMPOWERING YOUR BUSINESS WITH MULTI ENTITY MANAGEMENT

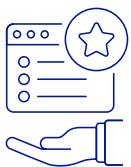

Save significant time during data-entry and maintenance, control the use of your master data, and conduct quick evaluations of all corporate entities at runtime.

Create synergies with Master Data Management

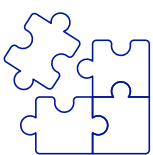

WORK EFFICIENTLY WITH OUR CENTRAL MANAGEMENT TOOL

Multi Entity Management simplifies and optimizes business processes. Through a central master data management tool, any master data can be provided to other companies across one or multiple databases.

HIGH DATA QUALITY FOR COMPLEX CORPORATE STRUCTURES

Multi Entity Management makes it easy to control multiple or complex corporate structures. With automated data distribution and a hierarchical structure for master data management, you are guaranteed both high data quality and security.

INTEGRATED WITH MICROSOFT DYNAMICS

Multi Entity Management by XtensionIT is a certified for Microsoft extension and, therefore, complies with the highest quality standards. The solution is fully integrated with Microsoft Dynamics NAV / 365 Business Central.

Superior master data distribution with high data quality and security

Multi Entity Management saves you a lot of time during data acquisition and maintenance. Execute operations such as entering new data in multiple companies, creating new account schedules, or setting up a whole new company in only a few minutes.

The functionalities within Multi Entity Management significantly improves the quality of the data across your entire corporate structure. All companies across your enterprise will, therefore, always work with the same data and data structure – minimizing redundancies and inconsistencies.

Streamlined cross-company evaluation

If you wish to simplify preparatory work for your annual financial statements or support your operational business entities with analyzes, Multi Entity Management provides flexible and fast access to consolidated data for your reporting. You can create valuable and reliable evaluations based on your organization's specific information requirements.

Easy set-up and configuration

It is easy to integrate Multi Entity Management to your existing Microsoft Dynamics NAV / 365 Business Central. Set-up and configuration of, for instance, user-rights and corporate structures, are quickly executed. The implementation of the solution only takes a few hours – even for complex enterprises. As our solution creates synergies at runtime for cross-company operations, your company is guaranteed added value!
